Andrei Bernatski
Front-End Developer

📍 Minsk, Belarus

ABOUT ME

Hey! I'm a front-end developer. My main technology stack consists of TypeScript, React (Next) and Redux (Toolkit, RTKQuery). I frequently use tools like VS Code, Git, GitHub, Webpack, Figma, and Postman.

Currently, I am undergoing training in the JavaScript/Front-End Stage 2 course at Rolling Scopes School. I have basic knowledge in UI design. Additionally, I have experience in migrating small applications from JavaScript to TypeScript and updating the overall UI for the entire application.

PROJECTS

Jobored ↗
A tool for viewing open vacancies on the web portal
